

FOCUSSED SECURITY ADVISORIES

Millions of threats, but which ones affect you and your systems? Choosing the right resources means not missing the little things that make all the difference.

Sûnnet Beskerming has your needs covered, with the Focussed Security Advisory Service - essential information about the threats that matter to your business and data systems, delivered when it matters.

SÛNNET
BESKERMING

BEFORE THE HACK

Information theft and successful hacker attacks are a matter of *when*, not *if*. Where are you going to be when it happens?

What would you give to be able to delay or prevent the loss of reputation, loss of business, and loss of income that such an event will lead to?

With the right people, and the right blend of Sûnnet Beskerming services, you can delay that unfortunate day for as long as possible. Sûnnet Beskerming gives you what you need:

- Know what the problem is.
- Know how to fix it.
- Know how to defend it.
- Know it before anyone else.

ONLY WHAT MATTERS

Each day, a flood of new information about real and imagined threats to information systems is released to wide variety of sources. Many of these reports are duplicates, others are poor data, and yet more are completely inaccurate.

Let Sûnnet Beskerming use its expertise to bring you only the information that matters, specifically for your systems, effectively and efficiently filtered from this flood of data.

WHEN IT MATTERS

Sûnnet Beskerming Advisory Service provides you with timely, relevant, and accurate information about the real nature of what it is you are facing.

This service gives you hours, days, weeks, months, or even years of advanced notice before an issue affects you.

Delivered whenever an issue is detected and analysed, you can rest easy, knowing that Sûnnet Beskerming's dedicated staff are busily hunting down issues that affect your business.

REAL PEDIGREE

A new product, with a pure bloodline.

Sûnnet Beskerming's Focussed Security Advisory Service draws on the experience and unmatched ability of the Information Security researchers at Sûnnet Beskerming.

The ability of company researchers to identify, analyse, track, and report on Information threats ahead of the industry has been proven time and time again over the years.

That ability is now being made available in a format that lets you gain a competitive advantage over attackers and your competitors, with information pertinent to the threats facing the systems and data stores in use by your business.

If you store or work on sensitive personal or financial data, you need Sûnnet Beskerming services to protect what is important to you and your clients.

Unless you have teams of people dedicated to researching new threats, you aren't going to catch them all before they hit you. Sûnnet Beskerming services allow your experts to make informed, rapid and accurate decisions.

Major companies and institutions that already have other Security services, such as NASA, major international banks, insurance companies, and top Information Security companies benefit from Sûnnet Beskerming services, and so can you.

Contact us today to get started with Information Security protection, the Sûnnet Beskerming way.

FOCUSSED SECURITY ADVISORY SERVICE

Be informed about the threat before it affects you. Know what the hackers are going to target, before they do. Sûnnet Beskerming Security Advisory Service provides you that knowledge, at a price you can afford.
